Dann kannst du im Template so etwas machen:

```html
html

<h3>Alle Bewertungen:</h3>

{% for review in reviews %}
    <div class="card mb-3">
        <div class="card-body">
            <p><strong>Overall:</strong> {{ review.overall_rating }}
            <p><strong>University:</strong> {{ review.uni_rating }},
            <p><strong>Freetime:</strong> {{ review.freetime_rating
            <p><strong>Nightlife:</strong> {{ review.nightime_rating
            <p><strong>Campus Life:</strong> {{ review.campus_life_
            <p><strong>Transportation:</strong> {{ review.transport
            <p><strong>Cost of Living:</strong> {{ review.cost_rati
            <p><strong>Living:</strong> {{ review.living_rating }}/
            <p><strong>Work Opportunities:</strong> {{ review.worko
            <p><strong>Safety:</strong> {{ review.safety_rating }}/
            <p><strong>Food:</strong> {{ review.food_rating }}/5</p
            <p><strong>Communication:</strong> {{ review.comunicati
        </div>
    </div>
{% else %}
    <p>Keine Bewertungen vorhanden.</p>
{% endfor %}
```

🔁 Was du ändern musst

In deiner HTML-Vorlage:

Sende eine Nachricht an ChatGPT
